

TANMAY LONDHE

Mumbai, IN | +91 9326342029 | tanmay.londhe.2029@gmail.com | [LinkedIn](#) | [Portfolio](#)

Enterprise AI & Automation professional experienced in translating complex business processes into scalable, technology-driven solutions across corporate functions. Experienced in working with executive leadership and cross-functional stakeholders to understand workflows, identify inefficiencies, and design end-to-end solutions. Strong hands-on foundation in AI/LLMs, intelligent automation, data, APIs, and enterprise systems, with experience taking solutions from process discovery and solution design through development and deployment. Particularly focused on building AI-powered enterprise solutions and bridging business requirements, product thinking, and technical execution.

EDUCATION

Dwarkadas J. Sanghvi College of Engineering

B.Tech in Electronics and Telecommunication Engineering

Minors in Web Application Development

Cumulative GPA: 6.83

Mumbai, In

2021 - 2025

EXPERIENCE

Oberoi Realty Limited

Senior Executive – Business Applications

Mumbai, In

Jul 2025 – Present

- Identify business problems across Finance, Tax, Operations, and Corporate functions, translating complex workflows into AI, data, and automation solutions in collaboration with senior and cross-functional stakeholders.
- Designed and built ORBIT, an enterprise automation platform using Python/Flask, integrating multiple business automations into a centralized, scalable, and secure platform.
- Developed Python-based data pipelines and ETL workflows for extracting, transforming, validating, and reconciling financial data from PDFs, Excel, APIs, SAP, Outlook, and other enterprise systems.
- Built AI-enabled document intelligence solutions combining OCR, image processing, fuzzy matching, machine learning approaches, and LLMs to convert unstructured documents into structured, validated data.
- Took solutions end-to-end from problem discovery, data analysis, and solution design to development, testing, deployment, and optimization, delivering measurable improvements in operational efficiency.

PROJECTS

ORBIT - Enterprise AI & Automation Platform

Designed and built an enterprise automation platform bringing Finance, Tax, Treasury, and Operations workflows into a centralized Python/Flask ecosystem. Built reusable components for data processing, background jobs, authentication, audit logging, usage analytics, and AI-enabled automation. Scaled the platform to 19 automations across 11 departments, with 11 live and approximately 3,741 hours of manual effort eliminated annually.

Tech: Python, Flask, OCR, LLMs, SQL, RBAC, JWT, REST APIs, ML Models

TrackIt -Workforce Analytics & Operations Platform

Designed and developed a workforce operations platform for construction environments, digitizing QR-based attendance, workforce movement, and operational tracking. Built backend data models, APIs, role-based access, event logging, and dashboards to provide real-time workforce visibility and analytics. Transformed fragmented manual processes into a centralized data platform supporting operational reporting and management decision-making.

Tech: React, TypeScript, NestJS, PostgreSQL, REST APIs, PowerBI

FundFlow Agent - Financial Data Automation

Developed an end-to-end analytics platform automating extraction, validation, reconciliation, and analysis of investment statements across financial institutions. Designed ETL pipelines producing analytics-ready datasets for operational reporting, forecasting, predictive analysis, and business intelligence dashboards while improving processing accuracy and reducing manual effort.

Tech: Python, ETL, Excel Automation, Pandas, OCR, Analytics

TECHNICAL SKILLS

LLM Integration • AI Applications • Machine Learning • OCR • Intelligent Automation • Microsoft Power Platform • Microsoft Graph • Excel Automation • SAP Automation • Python • Flask • JavaScript • TypeScript • React • NestJS • SQL • PostgreSQL • Git
