

TANMAY LONDHE

Mumbai, IN | +91 9326342029 | tanmaylondhe@gmail.com | [LinkedIn](#) | [Portfolio](#)

Business Systems & AI Automation Engineer experienced in building enterprise software, internal business applications, and intelligent automation at the intersection of software, operations, and business processes. Skilled in translating complex business workflows into scalable, maintainable software solutions using Python, SQL, REST APIs, and AI-assisted development. Passionate about solving business problems through practical engineering, process improvement, and reliable automation.

EDUCATION

Dwarkadas J. Sanghvi College of Engineering

B.Tech in Electronics and Telecommunication Engineering

Minors in Web Application Development

Mumbai, In

2021 - 2025

EXPERIENCE

Obero Realty Limited

Senior Executive – Business Applications

Mumbai, In

Jul 2025 – Present

- Partner with executive leadership including the Chief Information Officer (CIO), Chief Financial Officer (CFO), Vice Presidents, department heads, and business stakeholders to identify operational challenges, define solution requirements, and deliver enterprise software and automation initiatives supporting critical business functions.
- Own the complete solution lifecycle from business process discovery, workflow design, technical documentation, and solution architecture to development, testing, deployment, and continuous improvement delivering production-ready Python solutions integrating SAP, REST APIs, Microsoft Power Platform, Excel, OCR, and LLMs.
- Design and implement internal business systems, automation workflows, and AI-assisted document processing solutions that automate reporting, reconciliation, compliance validation, and operational processes, eliminating thousands of hours of manual effort annually while improving accuracy and reliability.
- Collaborate cross-functionally to redesign business workflows, define automation logic and business rules, develop executive dashboards and decision-support tools, and deliver maintainable systems that enable data-driven decision-making and long-term operational efficiency.

PROJECTS

TrackIt – Enterprise Workforce Management Platform

Designed and developed an enterprise workforce operations platform to digitize workforce tracking, attendance, and operational reporting across construction projects. Architected a role-based Progressive Web Application (PWA) with QR-based workflows, offline synchronization, RBAC, and real-time reporting. Designed scalable backend architecture using React, NestJS, Prisma, PostgreSQL, and Supabase, implementing business rules, event-driven workflows, and REST APIs. Built internal operational tools supporting workforce management, activity tracking, audit trails, and decision-making across multiple stakeholders.

Tech: React, TypeScript, NestJS, PostgreSQL, Prisma, Supabase, JWT, REST APIs

AI-Powered Financial Document Intelligence Platform

Developed an enterprise document processing system to automate extraction, validation, and processing of financial documents. Combined Python, OCR, deterministic validation logic, and LLMs to build reliable AI-assisted workflows for structured and semi-structured financial documents. Designed reusable automation pipelines that reduced manual processing effort while improving accuracy, consistency, and compliance across finance operations.

Tech: Python, OCR, LLMs, REST APIs, Excel, Prompt Engineering

Mutual Fund Statement Automation Platform

Built an end-to-end automation platform for extracting, validating, and reconciling investment data from financial statements. Developed Python-based ETL workflows to automate document ingestion, business rule validation, reconciliation, and reporting across multiple financial institutions. Implemented configurable processing pipelines with exception handling and automated reporting, significantly reducing manual effort and improving operational reliability.

Tech: Python, ETL, Excel Automation, PDF Processing, Business Rules

TECHNICAL SKILLS

Python, SQL, JavaScript, REST APIs, Microsoft Power Platform, Excel Automation, SAP Automation, OCR, LLM Integration, Git, React, TypeScript, NestJS, PostgreSQL, Prisma, Supabase, Power BI, AI Coding Assistants, Prompt Engineering
